

Zain Abbas

Data & Business Intelligence Consultant

Python | SQL | Power BI | Data Analytics | Process Automation

(+33) 78 29 42 444 | zzain.abbas@hotmail.com | Saint Genis, France | LinkedIn

Data & Analytics Professional with 5+ years delivering scalable data-driven solutions for international organisations, including IATA and CERN. Skilled in transforming complex datasets into actionable insights through advanced reporting, performance monitoring, and operational analytics. Proficiency in Python, SQL, Power BI, and Excel, with a proven ability to support cross-functional teams in informed decision-making and delivering scalable, maintainable solutions.

WORK EXPERIENCE

Independent Technical Development

Aug 2024 - Present

- Conducting technical and operational audits for FUNdamental Networking, providing subsequent technical support across data migration, website development from scratch, and overall ecosystem improvement (ongoing).
- Supporting BBold with website troubleshooting and bug resolution, as well as automation setup for client relationship management and email campaigns (ongoing).
- Maintained active familiarity with technical & financial data concepts through a project with Airport charges team at IATA.
- Developed an online technical portfolio, demonstrating maintainable code, data handling, and documentation practices.

Consultant - Data Analyst

Jan 2024 – Jul 2024

IATA - (International Air Transport Association) - Switzerland

- Delivered reporting and data quality validation for Special Cargo and Cargo Operations, ensuring accurate, consistent, and governance-compliant airline operational data.
- Built and maintained BI dashboards for KPI tracking and forecasting, reporting efficiency and operational visibility.
- Acted as liaison between commercial, operations, and data teams, translating business requirements into structured reporting outputs and aligned solutions.
- Supported airline stakeholders by resolving data, reporting, and system issues, ensuring continuous business operations.

Technical Consultant - Accounts Analyst

Dec 2021 – Aug 2023

BBold SÀRL – Switzerland

- Improved CRM data governance by cleaning, structuring, and integrating datasets across HubSpot and Zoho.
- Performed data validation and reconciliation to improve reporting accuracy and data reliability.
- Created metadata documentation and standardized data processes, enhancing traceability, auditability, and compliance.
- Developed and maintained the company website, supporting online visibility and targeted audience engagement through digital campaigns.

Data & Automation

Jul 2018 & Jul 2019

CERN (Conseil Européen pour la Recherche Nucléaire) – Switzerland

- Developed automated systems and data pipelines to support internal platforms.
- Built Power BI dashboards and documentation to improve data transparency and support operational decision-making.
- Managed data workflows using Docker in a Linux-based environment.

SOFTWARE SKILLS

- Proficient in Python, SQL, ReactJS, Java and working knowledge of C++ and Docker.
- Experienced in project management tools (JIRA), CRM (Salesforces, SAP, Hubspot, Zoho)
- Proficient in data management, analysis, reporting and visualizations (Power BI, MS Excel, SAP).

EDUCATION

Webster University Geneva, Switzerland

2017 - 2020

Bachelor of Science - Computer Science, Minor in Media Communications

- Excelled in core computer science disciplines, including data management, structured datasets, software development, data structures, technical communication, and analytical problem-solving.
